World Summit 2017
Montpellier, La Grande-Motte
21-24 June 2017

This year, our world summit brings us to Montpellier, South of France where together, gathered in a single place, we will discuss ideas and issues in a fun and relaxed atmosphere.

We'll be inspired by strategic thinkers and visionary leaders who will provide us a deeper understanding of our business future and challenges.

Don't miss this opportunity to learn & network and join our community of talented and bright minds!

Let's connect and build bridges together, welcome to the Global Campus!

Concrete knowledge for significant benefits!

Collaboration

Workshops & national associations

Because we strongly believe collaboration is the best way to innovate and make challenges become opportunities, we help each other to get stronger and smarter. International cooperation allows us to support exhibitors in their global strategy. Thanks to our national association guests, we'll get useful tips on how to exhibit in each of their countries.

We'll achieve more together, so share and connect!

Design&Engage

Panel session

We will start with new trends and then learn why Return on Emotion is also key for exhibitors outside of Return on Investment.

We'll see how to develop this ratio and explore many disciplines to learn how to succeed and engage our target audience.

Let's be inspired by our featured guests!

Strategy

Understanding how business grows today and how it will do tomorrow is our common goal. With these presentations, we'll look at what's driving our markets, their current situation and how to better access them. We'll also get figures and insights on why and how the exhibitors make their decisions. This will give us vision to bring us better efficiency and improve our profitability.

Don't be left out. Come and learn from our outstanding analysis!

Sustainability

ISO 20121 & sustainable actions

Great news! We are committed to sustainability and understanding the bigger picture. In this area, our best players will help us to think, act and give us the tools to become more sustainable.

Best practices for real world results.
